

Official Guide — Private Beta

VisioConnect

 **Welcome to the VisioConnect Private Beta!** If you are reading this document, it means you have been selected to be among our very first informed users. This guide will walk you through the testing phase step-by-step, from basic features to Premium options.

1. Accessing the Platform and Creating an Account

A. Go to the Platform

Visit the official address of our testing environment:

<https://visioconnect-1.vercel.app/>

B. Create Your Account

To ensure meeting security, a personal account is required.

1. **Fast Method (Recommended)** Click on quick sign-up via **Google** or **GitHub**. Your account will be created instantly, with no confirmation required.
2. **Classic Method (Email)** Enter a valid email address. A 6-digit security code will be sent to you. Copy this code onto the site to finalize your registration.

2. VIP Access: The Beta Code

The application is not yet open to the general public. During your journey, a **Beta Access Code** will be requested to unlock the platform.

- You will find this unique and confidential code in your invitation email (format: `VC-XXXX-XXXX`).
- Once entered and validated, you will gain access to the full portal.

3. Testing the Subscription System (Stripe)

We need your help to test our payment flow (upgrading to a Pro or Premium plan).

 **TEST Mode Active:** No real money will be debited. It is impossible to use a real card.

Go to the billing page (Premium) and use these dummy cards provided by Stripe to simulate different scenarios:

-  **Scenario 1: Successful Payment (Priority Test)** Verify that your account correctly receives Premium benefits after payment.
 - **Card Number:** 4242 4242 4242 4242
 - **Expiry Date:** Any date in the future (e.g., 12 / 28)
 - **CVC:** Any 3 digits (e.g., 123)
 - **Name on Card:** VisioConnect Tester
 - **Zip Code:** Any (e.g., 90210)
-  **Scenario 2: Declined Payment (Insufficient Funds)** Verify that the site correctly displays an error message indicating insufficient funds.
 - **Card Number:** 4000 0000 0000 0002
-  **Scenario 3: Expired Card** Simulate using a card with an expired date.
 - **Card Number:** 4000 0000 0000 0003
-  **Scenario 4: 3D Secure Verification (Bank Confirmation)** Ideal for seeing how VisioConnect reacts when a bank page opens to verify identity.
 - **Card Number:** 4000 0000 0000 3063

4. Your Main Testing Missions

Beyond payment, here are the aspects of the platform we are looking to stress-test:

A. Global Experience and Design (Critical)

- **Site-wide Navigation:** Do not limit yourself to the video conferencing page. Explore the home page, your dashboard, profile management, pricing, and all sub-pages.
- **User Experience (UX):** Does the journey feel fluid and logical? Is it easy to find your way around without help?
- **Visuals (UI):** What do you think of the rendering, colors, theme, and fonts? Does the interface feel "Premium"? Any suggestions for improvement are

welcome.

B. Technical Core (Video Conferencing)

- **Video and Audio Quality:** Toggle your camera and microphone. Is the latency acceptable?
 - **Effects (New):** Test the background blur with the customizable intensity slider.
 - **Screen Sharing:** Share a tab and check the clarity of the text for other participants.
 - **Whiteboard:** Draw with multiple people simultaneously and observe the synchronization.
 - **Chat:** Send messages during the meeting.
-

5. Reporting a Bug or Suggesting an Improvement

Your feedback is our number one asset. We expect two types of feedback:

1. Design and User Experience Feedback

Be critical and feel free to tell us spontaneously:

- *"I would find it more attractive if..."*
- *"I struggled to find how to..."*
- *"This page feels a bit empty."*

2. Technical Bug Reports

If a video freezes, a payment button doesn't respond, or an image doesn't display, please provide as many clues as possible:

1. **On which page did the error occur?** (Payment, waiting room, whiteboard...)
2. **On what hardware?** (Windows PC, Mac, iPhone, Android...)
3. **On what browser?** (Chrome version X, Safari, Edge...)
4. **Description of the error:** *"I clicked on the 4242 card button... and the page stayed white."*
5. **Optional but great:** A screenshot or a photo of the developer console ( →  tab).

Where to send your feedback?

1. **Contact Form (Recommended):** Use the contact section on the platform.
 2. **By Email:** theo.garces.aido@gmail.com
-

? 6. Frequently Asked Questions (FAQ)

Q. I am stuck on the error "Camera is being used by another application" (Device in Use). Make sure you have closed Microsoft Teams, Zoom, Discord, Google Meet, or OBS. These programs can monopolize webcam access in the background.

Q. I simulated the payment with the 4242 card... but my account status hasn't changed. Webhooks (the bridge between Stripe and our servers) can sometimes take a few seconds to trigger in test mode. Refresh the page after one minute.

Q. Do I have to pay anything at the end of the testing period? No. Your "Beta-Tester" account is 100% free, and you will keep the tested Premium features for life as a thank you.

Q. The system refuses my Beta Code. Check that there are no empty spaces before or after the code, and make sure to include the dashes in the `VC-XXXX-XXXX` format.

Thank you infinitely for spending time building the future of online collaboration with us.
